Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. This Office Action is in regards to the most recent papers filed on 8/20/2009.
2. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 8/20/2009 has been entered.

Response to Arguments

3. Applicant's arguments filed 8/20/2009 have been fully considered but they are not persuasive.
4. Applicant's arguments appear to rely solely on the newly amended subject matter, "detecting at least one cookie in the response and storing the at least one cookie and an Internet address of the content server in a user context database." However, as seen in the rejection below, this functionality is performed by the disclosure of Brown.

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

6. Claims 1, 4 are rejected under 35 U.S.C. 102(e) as being anticipated by Brown et al. (US Patent NO. 6970918B2 here after "Brown et al.").

7. Regarding Claim 1 Brown et al. discloses a method of accessing Internet resources provided by at least a content server (col. 3, line 51 & Fig 2a, 16) in a data transmission system including a proxy (col. 3, line 55 & Fig 2a, 11) connected to an Internet network (col. 3, line 50 & Fig 2a, 14), said proxy being provided with authentication means (col. 4, line 23 & Fig 3, 20) for authenticating a user when receiving a request for Internet resources (col. 4, line 18) therefrom, and wherein said proxy transmits the user request to said content server (col. 4, lines 3-8 & 29-30) which sends back a response to the proxy together with at least one cookie containing information about said user (col. 4, lines 30-32);

said proxy receiving said response over the internet network (col. 3, Lines 49-51 & Fig 2a, 14) and detecting at least one cookie in the response (col. 3, lines 5-16. The proxy detects information in the cookie, and thus must detect at least one cookie in the response.) and storing the at least one cookie and an Internet address of the content server in a user context database (col. 6, lines 27-42 and col. 4, lines 62-65) and transmitting said response to said user (col. 6, line 37) over the Internet network (col. 4, lines 11-15) after said cookie has been removed from said response (col. 6, lines 29-

31), so that said user can send all subsequent requests for accessing said Internet resources contained in said content server to said proxy (col. 7, lines 36-41) over the Internet network (col. 4, lines 11-15), wherein said cookie which has been stored in said user context database is added to all subsequent requests from said user for accessing Internet resources in said content server (col. 5, lines 17-27), wherein said proxy is configured to establish a connection to said content server on behalf of said user when receiving said request from said user, and wherein said cookie is transmitted by said configured proxy to said content server when said user sends subsequent requests for the URL of the said content server, even if said content server does not belong in the said proxy server's domain (Figure 2a).

8. Regarding Claim 4 Brown et al. disclose, Method according to claim 1, wherein the response from said content server to said proxy includes a statement "set-cookies," said statement being removed from said response (col. 6, lines 29-31) before transmitting said response to said user (col. 6, line 37).

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Scott Christensen whose telephone number is (571)270-1144. The examiner can normally be reached on Monday through Thursday 6:30AM - 4:00PM.
